

Platform modules

Each module can be deployed independently or as part of a unified suite.

01

Mailbox Management

Automated triage, classification, and routing of incoming safety correspondence

02

Intelligent Case Intake

AI-driven extraction, classification, and case creation from unstructured documents and emails

03

Narrative Generation

Automated, structured case narratives drafted to regulatory standards.

Seven production-ready modules. One unified suite.

Platform modules

Each module can be deployed independently or as part of a unified suite.

04

Redaction

Automated PII/PHI detection and redaction for regulatory submissions and sharing

05

Translation

Medical-grade translation across 30+ languages, validated for PV terminology

Seven production-ready modules. One unified suite.

Platform modules

Each module can be deployed independently or as part of a unified suite.

06

Literature Monitoring

Automated screening of medical literature with relevance scoring and deduplication

07

Aggregate Reporting

Structured data aggregation and narrative generation for PSUR, DSUR, and PBRER

FUTURE MODULES

Signal Detection

Medical Information

Quality Management
